BUILDING SOLUTIONS AROUND YOUR GENSET

Tramont has been a leading provider of diesel fuel containment systems, genset enclosures and packaging solutions for the standby and prime power industries for over 40 years. We combine responsive customer service, design expertise and manufacturing capabilities to deliver products that set the standard for innovation, competitive pricing, and quality.

- **Sales and Customer Service:** We are experienced responding to specs and requests for proposals that range from simple to complex.
- **Engineering:** Whether it is a single fuel tank or a highly customized project, we will design to your requirements.
- **Manufacturing:** We have years of experience building Tanks, Walkways, and Enclosures, and assembling them into complete packaged units.

TRAMONT PRODUCTS

Day Tanks

Tramont offers Day Tanks 10 to 1000 gallons capacity. UL 142 and ULC S601 Listed. The TRS Series Day Tank includes the System 2000 PLUS™ Electronic Control Module (ECM) to monitor and control the tank's pump and provide local and remote annunciation of fuel level conditions. Tramont also offers the TRX Series, a basic tank with no pump or motor, used as a main or storage unit.

Options include:

- Custom dimensions
- 10 to 350 gallon OSHPD seismic certification
- Open or sealed containment basin, 150% or 200% of internal tank capacity
- Various sized pumps and motors
- Duplex and reverse pumps
- Weather-resistant cover
- Light stacks
- Audio and visual alarms
- Priming pumps
- Fuel oil cooler
- Standard color gloss gray, custom colors available

Right: TRS Day Tank with optional duplex pumps and visual alarm.

TRAMONT AND THE UCA GROUP: Tramont Manufacturing is a member of the UCA Group of companies. Headquartered in Elgin, Illinois, the UCA Group operates manufacturing and engineering companies in North America, Europe and Asia. At Tramont we are building on our past success by drawing on the UCA Group's broad-based resources, skills, knowledge, and purchasing power.

TRAMONT PRODUCTS

Sub Base Tanks

Tramont offers a wide selection of standard sizes, and can also custom design tanks to meet your special needs. Tanks are UL 142 and ULC S601 Listed. Sub Base Tanks are available in virtually any gallon capacity, up to 60" high, standard double-wall construction.

Options include:

- UL 2085 Fire Rated
- Day Tank configuration with System 2000PLUS ECM
- Spill/fill box
- Diamond plate tank surface
- Vent configuration/extension
- Additional fittings
- Isolator skirt
- Pitched top (rain runoff)
- Immersion heater
- Selected local code compliant
- Standard color gloss black, custom colors available

Main Tanks

For above-ground applications where larger fuel capacity is required. UL 142 Listed. Cylindrical and rectangular design.

Options include:

- UL 2085 Fire Rated
- Day tank configuration, with System 2000PLUS ECM
- Standard color gloss white, custom colors available.

Rectangular and Cylindrical Main Tanks.

Mobile Power

Tramont POWERTRAK™ Trailers provide an onboard fuel source for mobile standby power applications. Trailers meet D.O.T. standards. Order as a stand alone unit, or packaged with your genset and Enclosure. Available in single, dual or triple axle design. Trailers include DOT/ICC lighting with six-pole connector plug; adjustable height pintle/ball hitch; adjustable front jack stand and two adjustable rear jack stands; heavy duty fenders coated with non-skid material on top surface and electric all-wheel brakes. Optional features available.

Trailer prior to mounting of genset.

Parts and Accessories

Tramont offers an extensive selection of parts and accessories for all product lines, including Day Tanks, Sub Base Tanks, and Enclosures. If we built the product, we can supply the replacement part or upgrade kit.

Selection of Day Tank and Sub Base Tank components.

TRAMONT PRODUCTS

Walkways

Free standing and cantilevered designs. Custom-designed configurations make it easy for service personnel to access elevated work spaces. Designed to OSHA guidelines. Offerings include:

- **Stairs:** Provide access to elevated control panels/breakers.
- **Platform:** Stairs with attached support surface allow access to outward opening doors.
- **Walkways:** Provide pathway to elevated doors. Corner, dual or walk around models.

Enclosures

Tramont POWERHOUSE™ Enclosures help protect your tank, genset and related components from the elements and unauthorized access. Durable powder-coat texture finish. Includes stainless steel hardware. Bolt-together construction makes it easy to remove panels. Designed to accept internal or external silencers. Pitched roof directs water away from unit. Options include:

- Weather-Protective design offers protection from wind, rain, snow, ice, sun, and debris
- Sound-Attenuated design offers protection from elements and provides noise reduction to customer specifications
- Steel, stainless steel, galvaneal, or aluminum construction
- Wind certification to customer specifications
- IBC (International Building Code) certification
- Fourteen standard colors, including major generator manufacturers; custom colors available

Genset Packaging

Tramont will assemble your genset into a complete package designed to your specifications that includes required Tramont and customer provided elements. Tramont provided components may include:

- Weather-Protective or Sound-Attenuated Enclosure
- Lift Base
- Sub Base Tank
- Day Tank
- Internal or external silencer
- Walkways

The completed unit can be shipped anywhere, ready for installation.

Stairs and Platform installed between gensets.

Sub Base Tank/Enclosure Package with Stairs and Walkway.

Sub Base Tank is moved into position prior to packaging with Enclosure.

Motive Energy, a Division of Tramont Manufacturing: Motive Energy designs and manufactures precision components used in critical applications. Industries served include power generation; utilities; alternative energy; passenger and freight locomotives; mining machinery; military; infrastructure and more. Products include electrical and mechanical enclosures, oil-water separators, fuel tanks and custom fabricated components.
