

**TRAMONT™**  
a UCA Group Company

**What you want**

**When you want it**

**No surprises**

**POWERTRAK™ Trailers**

## Put power in motion with **POWERTRAK™ Trailers**

**When it comes to Mobile Power, Tramont Manufacturing sets the industry standard.**

Tramont Manufacturing Trailers provide an onboard fuel source when you need to deliver power to a remote location. They are built for tough industrial use and feature a wide selection of standard and optional features.

### **Durable and reliable**

POWERTRAK Trailers have a track record of success. For almost 20 years they have been safely supporting gensets while providing a source of fuel in mobile applications.

### **Wide selection of models, sizes and features**

POWERTRAK Trailers:

- Include an integral Sub Base Diesel Fuel Tank.
- Support gensets up to approximately 500kW.
- Are built in single, dual or tri-axle configurations, depending upon your application.
- Are available with generator mounting platform up to 70 inches wide, 24,000 lbs gross vehicle weight rating (GVWR).
- Can also be built as a flat deck unit for supporting gensets without a fuel tank.

*Tramont POWERTRAK trailer before mounting of genset. This dual axle trailer includes an optional spare tire.*

*Enclosure and generator mounted on tri-axle trailer.*

# POWERTRAK Trailers

#### Tramont Manufacturing Complete Product Line

In addition to trailers, Tramont offers an extensive selection of products and services for the standby and prime power industry. Our products include:

Sub Base Tanks

Day Tanks

Main Tanks

Sound-Attenuated and Weather-Protective Enclosures

Complete packaging solutions

Repair and replacement parts, upgrade kits

## Make it a complete package

Tramont does much more than design and build individual components such as Trailers, Sub Base Tanks, Day Tanks and Enclosures. We also bring them all together with a complete selection of genset packaging solutions.

### Load & Go™

With our Load & Go program, you send Tramont your factory enclosed generator. We will mount it to Trailer or Sub Base Tank built to your specifications and then ship the completed package to your destination, ready to install.

### Custom packages

Tramont will design and build a complete mobile or stationary package around your genset. Package components include Sound-Attenuated and Weather-Protective POWERHOUSE™ Enclosures, Trailers, Lift Bases, Day Tanks, Sub Base Tanks and Elevated Access. We will also incorporate a wide selection of Tramont or customer provided components and services. These include:

- Basic electrical lighting package
- Walk-in package
- Load center
- Panel board
- Breaker
- Transformer
- Heater
- Neutral grounding resistor
- Emergency stop
- Mount & wire customer-provided batteries and/or battery charger
- Automatic transfer switch
- Day Tank mounted inside enclosure
- Skid-resistant diamond plate floor

### Contact Tramont
